

Welcome to your **TARGET LIST** **2021**

Of course, the beauty of birdwatching is that pretty much anything can appear at any time, but the species on this list can all be expected to turn up in the UK over the course of a year, so use it to record what you've seen, and to work out where and when your best chance of seeing each bird is.

Habitats are generalised guides to where each bird is most frequently encountered. They are not hard and fast. Similarly, the indicators of the time of year are just indicators about when a bird is most often seen, not fixed rules.

XXX Common
XX Less common or scarce
X More scarce or rare
R Resident all year
S Summer visitor
W Winter visitor
P Passage
V Vagrant (rare)
